### September traffic results round up a strong Q3; chg. est & PT

**Topic:** Yesterday, FWAG reported traffic results for September 2024, which finished off the company's third and seasonaly most important quarter. In detail:

For the September month, group passenger numbers rose by 7% yoy to 4.06m (eNuW: 4.03m), driven by a solid development at the group's main airport (Vienna: +5.4% yoy to 3.08m) but also by strong growth at Malta (0.90m, +10% yoy) and Kosice (0.08m, + 22% yoy).

This led to a Q3 passenger volume of 12.9m, which is not only 8% above the old record of Q3'19, but also up 8% yoy and 16% qoq. Seasonally, Q3 is the most busy quarter as it comprises the main travel season during the summer holidays. Therefore, we regard the strong passenger growth, especially in comparison to last year's strong Q3, as outstanding and it highlights the current balance of high demand meeting the capacity increases of the airlines during the summer season.

For the first nine months, group passenger numbers stand a solid 9% above 9M'23, showing that FWAG could benefit from much better passengers development than previously anticipated at the start of '24.

FWAG is due to report Q3'24e results on 14th November '24, but we already expect a **new top line record**. Thanks to the statutory increase of airport charges at Vienna (c. 40% of group sales) by 9.7% per 1st January '24 coupled with Q3' passenger growth of 8%, **group sales look set to grow 12% yoy to € 306m** in Q3'24e (eNuW).

Nex to passenger numbers, which is the main earnings driver, FWAG has presented some strong cargo figures. Here, cargo volume in Vienna is up 26% yoy (+24% yoy in Q3; +20% yoy per 9M), driven by a shift from shipping to air cargo due the current situation in the Red Sea. While cargo is not a major revenue driven (c. 5% of sales), it nevertheless shows a positive contribution for FWAG.

Furthermore, we precised our FY'24e and '25e passengers estimates and also now include the statutory price increase of airport charges by 4.5% for FY'25e (prev. eNuW: 4%), effective as of 1st January '25, in our model. Consequently, our DCF-based **PT increases to € 61.00** (old: € 59.00), however, the shares remain a **HOLD** with only 13% upside.

Under no circumstances shall NuWays AG, any of its employees involved in the preparation, have any liability for possible errors or incompleteness of the information included in this research report – neither in relation to indirect or direct nor consequential damages. Liability for damages arising either directly or as a consequence of the use of information, opinions and estimates is also excluded. Past performance of a financial instrument is not necessarily indicative of future performance.

#### 2. Responsibilities

This research report was prepared by the research analyst named on the front page (the "Producer"). The Producer is solely responsible for the views and estimates expressed in this report. The report has been prepared independently. The content of the research report was not influenced by the issuer of the analysed financial instrument at any time. It may be possible that parts of the research report were handed out to the issuer for information purposes prior to the publication without any major amendments being made thereafter.

### 3. Organisational Requirements

NuWays AG took internal organisational and regulative precautions to avoid or accordingly disclose possible conflicts of interest in connection with the preparation and distribution of the research report. All members of NuWays AG involved in the preparation of the research report are subject to internal compliance regulations. No part of the Producer's compensation is directly or indirectly related to the preparation of this financial analysis. In case a research analyst or a closely related person is confronted with a conflict of interest, the research analyst is restricted from covering this company.

### 4. Information Concerning the Methods of Valuation/Update

The determination of the fair value per share, i.e. the price target, and the resultant rating is done on the basis of the adjusted free cash flow (adj. FCF) method and on the basis of the discounted cash flow – DCF model. Furthermore, a peer group comparison is made.

The adj. FCF method is based on the assumption that investors purchase assets only at a price (enterprise value) at which the operating cash flow return after taxes on this investment exceeds their opportunity costs in the form of a hurdle rate of 7.5%. The operating cash flow is calculated as EBITDA less maintenance capex and taxes.

Within the framework of the DCF approach, the future free cash flows are calculated initially on the basis of a fictitious capital structure of 100% equity, i.e. interest and repayments on debt capital are not factored in initially. The adjust-

ment towards the actual capital structure is done by discounting the calculated free cash flows with the weighted average cost of capital (WACC), which takes into account both the cost of equity capital and the cost of debt. After discounting, the calculated total enterprise value is reduced by the interest-bearing debt capital in order to arrive at the equity value.

NuWays AG uses the following three-step rating system for the analysed companies:

Buy: Sustainable upside potential of more than 20% within 12 months

Sell: Sustainable downside potential of more than 20% within 12 months.

Hold: Upside/downside potential is limited. No immediate catalyst visible.

The decision on the choice of the financial instruments analysed in this document was solely made by NuWays AG. The opinions and estimates in this research report are subject to change without notice. It is within the discretion of NuWays AG whether and when it publishes an update to this research report, but in general updates are created on a regular basis, after 6 months at the latest. A sensitivity analysis is included and published in company's initial studies.

#### 5. Major Sources of Information

Part of the information required for this research report was made available by the issuer of the financial instrument.
