

The logo for 'cenit' is positioned in the top right corner. It features the word 'cenit' in a bold, white, lowercase sans-serif font. A white horizontal line is positioned below the letters 'i' and 't', extending slightly to the right of the 't'.

**cenit**

A teal-colored horizontal bar at the bottom of the page contains the text 'QUARTERLY STATEMENT Q1 2022' in white, uppercase, sans-serif font. The background of the entire page is a dark blue and black profile of a woman's head, overlaid with a complex network of glowing blue and orange lines and data points, suggesting a digital or financial theme.

## Report on assets, financial and earnings situation

### **Strong consulting and services business (previous year: +13.9%) and growth in recurring revenue (+2.0%) define the sales performance (EUR +1,184 k, +3.5%) in Q1 2022**

In a market environment still characterized by the uncertainties as a result of the war in Ukraine, as well as the COVID 19 pandemic, we succeeded in Q1 2022 in continuing the positive trend of the fourth quarter of 2021. A major factor contributing to this was a year-on-year increase of EUR 1,254 k (+13.9%) in consulting and service sales in the aerospace segment, among others.

Against the above mentioned background and taking into account a decrease in other operating income (EUR -260 k), a lower material expense ratio (-0.8% points) and inflation-related increases in operational expenses (+2.2%), group EBIT improved by 25.9% to EUR -387 k. The latter was possible despite the loss of approx. EUR 0.8 million in short-time allowances in Q1 2021, which underlines the strength of the business model.

### **Overview of segments**

In the first three months of 2022, the performance of the two segments PLM and EIM differed, with the PLM segment increasing segment sales by EUR 1,459 k and segment EBIT by EUR 151 k, which resulted in a segment EBIT of EUR -673 k. In contrast, the EIM segment - as planned - fell slightly short of its prior-year segment sales and segment EBIT, but was able to generate a positive segment EBIT of EUR 286 k.

### **Earnings per share slightly reduced by tax effects**

Despite the increased group EBIT, earnings per share decreased to Cent -7.1 (previous year: Cent -6.1) in Q1 2022, due to the tax income still determined in the prior-year quarter.

### **Very solid financial strength as a result of an operating cash flow increased by EUR 3,520 k (+45.9%) of EUR 11,196 k and cash and cash equivalents of EUR 36,710 k**

In the first three months of the fiscal year, the CENIT Group generated a cashflow of EUR 10,289 k (previous year: EUR 6,559 k). This increase in comparison to the prior-year period was generated mainly from higher cash inflows from working capital (EUR +3,714 k), which in turn is the result of the lower level of receivables at the end of the first quarter of 2022. As a consequence, the cash flow from operating activities increased from EUR 7,676 k to EUR 11,196 k (EUR +3,520 k). Consequently, the cashflow was only required to a small extent for investments in non-current assets (EUR 158 k) and for the payment of lease liabilities (EUR 749 k) and thus increased the group's operative liquidity by EUR 10,289 k in comparison to December 31, 2021.

A constantly high consolidated equity ratio of 44%, stable and sustainable net liquidity of more than EUR 17 million and a growing amount of cash and cash equivalents characterizes the CENIT Group's asset position. At the same time, the consolidated balance sheet total increased by EUR +5,273 k compared to December 31, 2021. On the assets side, this development is mainly due to the increase in cash and cash equivalents (EUR +10,349 k) and a corresponding decrease in trade receivables (EUR -5,288 k), while on the liabilities side it is mainly due to traditionally higher liabilities from service contracts in the first quarter (EUR +11,166 k), which are compensated by lower other liabilities (EUR -2,965 k).

## **Events after the interim report period**

With the purchase agreement of April 3, 2022, the CENIT Group acquired 74.9% of the shares of ISR Information Products AG. With its head office in Braunschweig, ISR Information Products AG offers software products and IT solutions in the field of analytics, process digitalization and application management. It has six locations in Germany, employs 200 people and, according to preliminary figures, generated a revenue of EUR 22.8 million, as well as an EBIT of EUR 3.2 million in the 2021 fiscal year.

## **Employees**

As of the reporting date March 31, 2022, the CENIT Group had 673 employees (31/12/2021: 704). Despite the pandemic, we succeeded in keeping staff turnover very low. In the future, too, the economic opportunities arising from the recovery of the global economy are to be taken advantage of with a motivated and well-trained staff. To make this possible, CENIT intends to recruit suitable employees in order to be able to successfully master the future challenges resulting from the planned growth.

## **Report on opportunities and risks**

For information on the principal opportunities and risks – in particular the impact of the COVID-19 pandemic – for the anticipated development of the CENIT Group, we refer to the relevant comments in the Report on expected developments within the Group's management report for the period as of December 31, 2021 as well as to the statements in this quarterly statement.

## **Report on forecasts and other statements regarding anticipated development**

Over the course of a year, business activity is subject to certain seasonal fluctuations. In the past, contributions to sales and earnings tended to be lowest in the first quarter and highest in the fourth quarter, primarily due to a traditionally strong year-end business for the software industry. Consequently, interim results have only limited value as indicators of results for the whole fiscal year.

For the current year, we confirm our adjusted outlook for the CENIT Group, following the acquisition of ISR Information Products AG. We expect sales of around EUR 170,000 k and earnings (EBIT) of around EUR 9,000 k, provided that the general (economic) conditions do not deteriorate significantly due to the war in Ukraine and the Corona pandemic. Currently, the situation in Ukraine results rather in increased sales activities in the PLM defense segment.
